

Shopware improves features with 5.2 launch

Online shop provider [Shopware](#) has announced that its latest version, 5.2, is now available to users.

According to the company, many of the ideas and developments have derived from user suggestions. "For several years, we have encouraged an open dialogue with the Community in order to more directly connect with their wishes for an eCommerce platform," said Shopware CEO Stefan Hamann.

Improvements include improved shop fronts for buyers with a greater focus on usability, Shopware ERP powered by Shopware, improved marketing tool for merchants and free sub-shops.

You can read about the new Shopware developments in greater detail on [their blog here](#).
